IUI

UTERINE INSEMINATOR FOR WASHED SPERMATOZOA

The IUI is an intrauterine insemination cannula with two lateral distal ports for optimal sperm distribution.

FEATURES

- positioner to prevent damage to fundus
- two lateral ports at distal end for optimal sperm distribution
- arrows on handle to indicate lateral ports at distal end
- markings on the outer tube
- handle with luer lock for a more secure fitting to syringes

IUI MEMO

UTERINE INSEMINATOR FOR WASHED SPERMATOZOA WITH MEMORY FUNCTION

The IUI Memo is an intrauterine insemination cannula with MEMO function, which proactively enables the distal tip to bend according to cervical flexion.

FEATURES

- positioner to prevent damage to fundus
- two lateral ports at distal end for optimal sperm distribution
- arrows on handle to indicate lateral ports at distal end
- markings on outer tube
- memory function
- handle with luer lock for a more secure fitting to syringes

IUI PLUS

UTERINE INSEMINATOR FOR WASHED SPERMATOZOA WITH MANDREL

The IUI Plus is a set for difficult cervical passage, consisting of two parts:

- A) Loading cannula
- B) Mandrel

FEATURES

- positioner for depth adjustment
- a combination of a soft, flexible intrauterine cannula and a solid cervix cannula
- markings on outer tube for easy positioning
- mandrel to prevent mucus to enter the loading cannula
- handle with luer lock for a more secure fitting to syringes

SMOOZE IUI

FLEXIBLE INTRAUTERINE INSEMINATION CANNULA

The Smooze IUI is a flexible intrauterine insemination cannula with a smooth tip for less traumatic inseminations.

FEATURES

- smooth tip with one distal side hole
- very flexible and therefore less traumatic
- handle with luer lock for a more secure fitting to syringes
- available in 3 lengths:

- A) Short 7 cm (not including handle)
B) Medium 14 cm (not including handle)
C) Long 20 cm (not including handle)

EMTRAC DELPHIN

EMBRYO TRANSFER CATHETER WITH POSITIONER AND SOFT UTERINE CATHETER

The combination of a soft flexible intrauterine catheter and a solid cervix catheter creates an universal catheter for easy insertion in the most difficult cervical tract.

FEATURES

- positioner to prevent damage to fundus
- one piece catheter
- markings to indicate depth
- extra soft uterine catheter to ensure safe insertion through cervix
- handle with luer lock for a more secure fitting to syringes
- **NEW:** available with **Tip-in-Sight (TIS) technology** for precise positioning of the catheter tip under ultrasound guidance

TIP OPTIONS

SEMTRAC C

SOFT EMBRYO TRANSFER CATHETER

The Semtrac C is a soft embryo transfer catheter.

FEATURES

- soft bullet shaped tip to minimize trauma
- one piece economical catheter
- markings to indicate depth
- metal tube inside for better control
- handle with luer lock for a more secure fitting to syringes
- **NEW:** available with Tip-in-Sight (TIS) technology for precise positioning of the catheter tip under ultrasound guidance

THE TULIP

PRESHAPED EMBRYO TRANSFER CATHETER WITH TULIP SHAPED BULB

The Tulip is a set for difficult cervical passage, consisting of two parts: a guiding catheter (A) and a loading catheter (C).

FEATURES

- preshaped guiding catheter, ideally curved for easy entry when uterus is flexed
- the Tulip tip enables easy atraumatic entry through the cervical canal
- positioner for depth adjustment
- markings on outer tube for easy positioning
- handle with luer lock fitting for a more secure connection to syringes
- reinforced metal support of loading catheter for optimal control
- arrow marking on outer tube for curve indication

FOLLICLE ASPIRATION SET FEATURES & ACCESSORIES

NEEDLE TYPES

3 needle types, available in various sizes and dimensions to determine your own specification:

Single Lumen Single Lumen Flush Double Lumen Flush

NEEDLE TIPS

2 types of needle tips to guarantee clean facet cutting:

Back Cut Bevel  Lancet Bevel 

TIP MARKINGS

2 types of tip markings to offer excellent ultrasound visibility of the needle tip:

Dual Laser Marking  Embossed Marking 

HANDLES

2 types of handles available for individual comfort (only for single lumen flush & double lumen flush):

U shaped handle  Y shaped handle 

TRANSLUCENT TUBING

3 types of translucent tubing in any desired length (maximum length thick wall tubing is 120cm/47.2 inch):

Regular Tubing for standard oocyte aspiration set up
Soft Tubing allows control of the fluid
Thick Wall Tubing no kinking of the tubing

CORKS

2 types of silicone corks for a secure connection to test tubes:

Small 14x18x20 mm 0.55 x 0.71 x 0.79 inch
Medium 21x 27x30 mm 0.83 x 1.06 x 1.18 inch

OTHER ACCESSORIES - SPECIALS

3-way Valve  Luer Lock Needle (For direct connection to a syringe) 

Male/male Connector  Stainless steel flushing cannula

SUPERIOR FAS SINGLE LUMEN

CUSTOM-MADE FOLLICLE ASPIRATION SET

The Superior FAS, the follicle aspiration set is implemented for ultrasound-guided, transvaginal harvesting of oocytes from follicles for IVF and ICSI.

FEATURES

- sharp lancet and back cut bevel tip available that ensure a clean facet cutting
- dual laser and embossed echogenic marked tip available which offer stable and excellent vision during ultrasound
- various needle sizes for ovaries with complicated and/or limited access
- translucent tubing in the same size as needle for safe oocyte retrieval
- arrow marking on handle for bevel point indication
- handle shape facilitates rotation
- custom-made

SUPERIOR FAS SINGLE LUMEN FLUSH

CUSTOM-MADE FOLLICLE ASPIRATION SET

The Superior FAS, the follicle aspiration set is implemented for ultrasound-guided, transvaginal harvesting of oocytes from follicles for IVF and ICSI.

FEATURES

- flushing connector enables flushing and aspirating during complicated oocyte retrieval or when few mature oocytes occur
- flushing and aspirating procedure is performed separately through one lumen
- sharp lancet and back cut bevel tip available that ensure a clean facet cutting
- dual laser and embossed echogenic marked tip available which offer stable and excellent vision during ultrasound
- translucent tubing in the same size as needle for safe oocyte retrieval
- various needle sizes for ovaries with complicated and/or limited access
- handle shape facilitates rotation
- custom-made

ECHOSAMPLER

INTRACAVITAL PATHOLOGY AND ENDOMETRIAL HISTOLOGY

The EchoSampler is a flexible sampling catheter used for dual diagnosis: intra cavital pathology and endometrial histology.

FEATURES

- dual diagnosis: cavital pathology and endometrial histology
- for ultrasound guided biopsy
- for saline infusion sonohysterography
- implemented in case of abnormal uterine bleeding
- flexible sampling catheter
- depth markings for ease in locating depth of insertion in the uterus
- tissue collection and saline infusion through side hole
- smooth rounded distal tip and small size for minimal patient discomfort and easy passage through cervical canal
- handle with luer lock for a more secure fitting to syringes
- echogenic line to facilitate visualisation when using ultrasound

HANDLING PIPETTE

PIPETTE FOR HANDLING EMBRYOS AND OOCYTES

The handling pipette is a single-use IVF laboratory micropipette used for transferring oocytes and embryos from one dish to another.

FEATURES

- IVF laboratory micropipette for dish-to-dish transfer of oocytes and embryos
- will not scratch dishes
- available in three lengths: 45, 55 and 94 mm
- available in two packaging variations: single packed and packed by ten pieces

STRIP-ID

PIPETTE FOR OOCYTES MANIPULATION

The Strip-ID is a single-use IVF laboratory micropipette used for oocytes manipulation and handling of embryos and oocytes

FEATURES

- superior quality that ensures smooth edges for precise denudation
- strict individual microscopic quality inspection
- flexible, unbreakable material that will not scratch dishes
- convenient colour-coded multi-packaging that allows easy release of a single pipette
- extensive variety of sizes available to suit your application
- fits the "Pipet-ID(s)" and is compatible with most popular used micropipettors

PIPET-ID

MICROPIPETTOR

The Pipet-ID and Pipet-IDs are reusable IVF laboratory micropipettors developed to fit the "Strip-ID" micropipettes and most other popular micropipettes (Ø 0.9 mm OD)

FEATURES

- Available in two different sizes to fit every size of hand
 - **Pipet-ID** for regular to large hands
 - **Pipet-IDs** for small to regular hands
- Ergonomic design
- Adjustable aspiration volume (min ≈ 0.2 µl, max ≈ 3 µl)
- Total expulsion feature
- Stainless steel table holder included
- Spare parts kit included (includes extra seals, plunger wire and hexagon key)
- Designed for use with the "Strip-ID" micropipettes. Also fits most plastic micropipettes (Ø 0.9 mm OD, 0.6 mm ID)
